Field Day comes and goes. But not without a lot of fun at the GARS site. For those of you that didn't make it, we had a great time, great food, a bunch of contacts and a chance to say 73 to a lot of friends that we haven't seen since last year. We had several first time visitors and the GOTA station stayed busy.

I tried working a satellite during field day. I've done it before, but this time I wasn't as prepared. Looking over the little bit of a write up in QST, I was hoping to make it work. We did hear AO51 on two passes, but couldn't get back up there. A little more planning, and we probably could have made it. Of course our great FD location with all the trees for hanging wire antennas isn't a lot of help when needing a clear path to the west at an azimuth of about 15 degrees. It's back to the drawing board for next year.

Fund raising time in August. We'll be helping out at the dog show again. Amy will be passing around a signup sheet at the next meeting, so don't be bashful. We enjoy great meals at Field Day and a little new equipment every once in a while, so keep up the good work and help keep the funds coming in. If you're new to the club, we'll explain our best fund raising activity during the next meeting.

We could use additional notebook computers. So if you are about to retire one, or you know someone that is, we could use it. If it runs Windows 2000 or Windows XP, we can most likely use it.

Net check-ins have been outstanding. We have from 30 to 40 check-ins almost every week. These may seem a lot of the same old thing, but they are just one more exercise in preparation for a serious situation where our service may be required. They're also a good place to hear announcements about GARS activities. And don't forget this is called the want – swap – sell – information net. The Wednesday evening 6 meter net has been gaining momentum. Check the web site for specifics. Spread the word about TechFest. It's January 12th. We'll be passing out invitations at the next meeting.

If you haven't been listening, the repeater is staying busy. It starts in the morning with drive time, and seems to be active on and off all day. Then again at drive time there are several conversations. So turn on the radio and participate. I'm sure you have something to add.

The GARZETTE

The GARZETTE is the official monthly organ of the Gwinnett Amateur Radio Society serving its members and other persons interested in the advancement of the amateur radio art.

Original articles, art, and photos are invited and encouraged. Previously copyrighted submissions cannot be accepted for reprinting unless permission from the appropriate publisher is provided in writing along with the information being submitted. If reprints are from publications allowing their unrestricted use, please include a copy of the printed permission contained in the publication.

If possible, bring your articles to the monthly meeting in Microsoft Word format or email to ka4kkf@arrl.net. Artwork can be accepted in most any graphics format and can be submitted via email to the same address. Alternate means of submittal can be arranged when necessary. In keeping with the amateur radio spirit, permission is hereby granted for the reproduction of *The GARZETTE* articles by other amateur radio club newsletters provided that proper credit is given to the individual author and to *The GARZETTE*.

The GARZETTE is published each month with the assistance of Hal Manning, who prints the news letter. Rick Patchin, KD4RFK does the final production work on *The GARZETTE* by folding & labeling. Bill Cherepay, WB4WTN, stamps and gets the end product to the Post Office each month. Norm Schklar, wa4zxv, manages email delivery. Many thanks to each of them and all article contributors. Deadline for submissions is the 20th of each month for inclusion in the following month's issue.

June 2007 GARS General Meeting

June 12, 2007

The president, Norm Schklar, WA4ZXV, called the meeting to order at 7:30.

First time guests were recognized and then the club officers were introduced.

Introductions of those present were made.

Two mini-programs were presented:

1. Norm, WA4ZXV, demonstrated a PAC12 QRP antenna made from a fishing pole and a two-band J-Pole.
2. David Bruse, W4DTR, demonstrated a dual band quad for 2 meter and 440.

Scott Serafin from Smith Barney gave a very interesting program on identity theft with a number of helpful suggestions.

Break

Earl Whatley, AF4FG, vice president, presented this year's scholarship check to Andrea Hartlage, KG4IUM.

Committee reports:

Earl Whatley, AF4FG, vice president, gave a report on the status of the repeater at the Boy Scout Camp in north Georgia. The club voted to donate \$150 to help complete the installation.

The minutes from the May meeting were approved as published in the Garzette.

The treasurer's report was given by Amy Woodrick, KE4IKF, and approved.

Four new members were voted into full membership:

Sakiyeh Walker, KD4KBO, technician class,
Gary Beckstedt, KI4VDP, technician class,
Mike Holmes, K4LMS, extra class,
Michael Weathers, ND4V, extra class.

Dave Bruse, W4DTR, gave a summary of future meeting programs.

Scott Hartlage, KF4PWI, gave the network report – net control stations are still needed.

Dick Sandberg, N9SJX, gave a report of Field Day which will be June 23 and 24 at Rhodes Jordan Park in Lawrenceville. Setup will begin Friday evening and continue Saturday morning, operating will begin at 2pm Saturday. There will be activities and power pole installation demonstrations.

Prize drawing was held.

The meeting was adjourned at 8:55.

Prepared by Randy Collins, secretary

Have Breakfast with GARS

GARS has a social breakfast on Saturday mornings at the Golden Coral on Riverside Drive in Lawrenceville. We usually get there about 0730 and leave about 0900 or 1000. We talk radios and solve the problems of the world. We even have a qso with w4ade in Florida over echolink.

It is a great time to meet and eat. The food is very good too.

The Golden Coral is behind Pike's nursery at the intersection of Riverside Drive and Hwy 120 in Lawrenceville.

Someone will be on the repeater too.

Hope to see you there.

Send in the Clowns

The Dacula Memorial Day Parade

By KI4MEH

There were no clowns, unless you count the pageant moms (but more about that later), but there was every other facet that makes a great parade. There were floats, military vehicles, police vehicles, horses (followed by guys with shovels), Scouts (of every shape and size), pretty girls, fire trucks, goats, dogs, cheerleaders (NO not again!), tractors, trucks, new cars, very old cars and very very small cars. Of course there was the main ingredient for any successful event, volunteer Hams. But I should start at the beginning.

We start, as all good Ham related activities do, with breakfast and coffee (lots of coffee) at a Waffle House near the event. I got there early to enjoy maximum conversation time with Hams I have not seen since last year's parade.

Why is it in a hobby/community that is centered on communication we do so little of it over the year with those nearest to us but talk weekly or more with those thousands of miles away?

The coffee was good, the conversations great, life just doesn't get any better than this. But all too soon its time to load up and get to the event.

It looks like an emergency evacuation as almost every vehicle in the parking lot tries to pull out on the road at the same time, leaving one old guy in a pickup that was trying to pull in at the time, bewildered and questioning his choice of breakfast places.

We gather at the parade staging area (a church parking lot) and Earl hands out the maps, parade participant lists and makes assignments. Everyone loaded up on sun- block. The participants start filing in and get lined up. Everything went like clockwork.

About then I notice my row was comprised mostly of cheerleaders (cursed again) and all form of pageant winners. There were so many pageant winners they were loaded on floats in groups and I think some were double stacked (the floats not the pageant winners)

There were so many rhinestone tiaras my sun block gave up and took cover. There must be someone in Dacula whose full time job is coming up with pageant titles. I think I saw a Little Miss Junior Pothole Lake View Sub-Division.

And with each pageant winner came a pageant Mom barking orders like a German field officer and trying to make sure their little darling had the best seat on the best side with the best lighting. There was more than one heated discussion among the Moms, very heated. If I had a large tub of Jell-O I could have paired up the Moms, sold tickets and made a few bucks but that would be wrong.

Eventually it was time to start the parade. The rows unfolded like a large paper snake. Soon everyone was gone without a problem and it was over. Over till next year. We gathered for a group picture and then dispersed. Each alone in their vehicle but still connected to the others by the invisible thread of our radios. Where else can you have this much fun for free?

Recipe for a fun Memorial Day BBQ, the Strange Antenna Challenge - 2007

Arnold Solomon, kc4zua

What happens when you take one 16 foot extension ladder, 2 C-clamps, and 50 feet of chicken wire fencing? You get a full day of fun with a "Strange Antenna Challenge" 20 meter vertical!

Since 2003, Erik Weaver N0EW and Dwayne Walker WB5PLJ have been hosting the Strange Antenna Challenge through the Ozark Hillbilly Portable Operations Team in Springfield, Missouri. After reading about the challenge on the ARRL web site, a group of radio amateurs from the morning drive time group embarked on a quest to build a "Strange Antenna" at the house of Bill Perkins, KB4KFT. Although an aluminum extension ladder was used in previous challenges, the group gave it a new twist. They added three radials made of chicken wire fencing. The ladder antenna was extended to its maximum length and secured with C-clamps.

Because the completed antenna was not resonant on the 20 meter band, an antenna tuning unit was connected to protect Bill's HF transceiver. The radiating element, AKA ladder, was quickly constructed and propped up against a tree by James and Sophia Loner, W4JHL and KI4EWW. Billy Christensen, KI4KGK attached the three radials to a pine 2 x 4 with sheet metal screws under the antenna. A patch of poison ivy caused the radials to be skewed to a configuration that enhanced northeastern coverage. The center conductor of the coaxial cable was fastened to the ladder with a set of locking pliers and the shield to the radials with another sheet metal screw. After hoisting the antenna up, it was secured with rope to the tree to prevent it from toppling over. Within just minutes, Sylvia Richardson, KG4OEG, established a contact with Northern Ireland. The evening's fate was sealed as Rob Osattin, KI4UTY, worked contacts late into the evening.

Atlanta Strange Antenna Challenge roster:

Bill Perkins	kb4kft
Arnold Solomon	kc4zua
Gordon Shirley	ki4tbj
Rob Osattin	ki4uty
Ron Hogue	
Sophia Loner	ki4eww
James Loner	w4jhl
Sylvia Richardson	kg4oeg
Addison Le Platte	ki4iya
Billy Christensen	ki4kgk

June 21, 2007
Recent Post on a Ham Radio Related Web Page

Dear Fellow Hams,

I would like to take a moment of your time with this open letter and help dispel rumors, and falsehoods that have been stated as fact. I have been assured from Top Management in Japan and the U.S. and I can assure you that the Kenwood Communications Sector has **no intention of exiting the Amateur Radio Marketplace**. It is a viable market. The Amateur Division has been running in the black since our restructuring several years ago. In fact, even with the loss of models over the last four years the Amateur Division has grown in Market, speaking highly of Kenwood quality and the loyalty of our customers.

At Dayton this year we introduced the new TM-V71A many were sold at the show. The preproduction prototype of the Dual Band TM-D710A was under Plexiglas, it too was received very well by the crowd; it will serve as the TM-D700A replacement in late August. We also gave away many thousands of Kenwood Branded items, such as brochure bags, hat pins and laminated prefix maps.

It is true the core business of Kenwood Communications is Land Mobile. The Land Mobile Radio Division is the second largest communications company in the world based on sales, second only to Motorola. It takes a full year for Amateur sales to equal Land Mobile sales of just one month. What we are doing is just good business sense with the product line and will keep us in the Amateur Market for many years to come.

As a fellow Ham, I want new radios as much as you. The business model of Kenwood is one platform for all markets with the only difference being firmware. It's exceedingly expensive to retool the factory for each market.

In addition, Europe and to be followed by the rest of the world has deemed that products be RoHS compliant. The Restriction of Hazardous Substances Directive (RoHS) is the reason we are introducing new products to replace current popular models that are noncompliant. These new models include TM-V71A, TM-D710A and others after the D710 reaches market.

Unfortunately, this must be accomplished before we start work on any new HF radios.

Most people believe that this is just a lead-free mandate, but it also includes the use six substances: Mercury, Cadmium, Hexavalent Chromium, Polybrominated biphenyls and Polybrominated biphenyl ether. The maximum concentrations are 1000ppm. For cadmium the limit is 100 ppm by weight of homogeneous material. The limits do not apply to the weight of the finished product, or even to a component, but to any single part that could be separated mechanically. (From Wikipedia) Everything that can be identified as a homogeneous material must meet the limit. So if it turns out that the case was made of plastic with 2,300 ppm PBB used as a flame retardant, then the entire radio would fail the requirements of the directive.

Please standby for more quality Kenwood products, they will come!

73, from the Helm!
